

Whitewater Customer Quote:

Dear Mr. Yap,

Following your e-mail what we can recommend is to use one company. I would choose definitely Whitewater. We have a Van Egdome device but unfortunately I can not recommend you to buy this type of attraction from Van Egdome. They might be good in other items but in aqua play type equipment they have absolutely no experience.

Best regards,
Giancarlo Casoli
Mirabilandia

Hi Mr. Giancarlo Casoli,

My name is WK Yap (Mr), General Manager of MEMIONTEC PTE LTD, a Singapore based company. We are a water and waste water specialist.

We understand that you are the biggest water play theme company in Italy. We hope to seek your opinions and advise on what suppliers to choose and use, based on your valuable experience in this business.

Currently we are doing a swimming pool project for Singapore Sport Councils and we are supplying Water play equipment and water slide as well. They have two possible suppliers for both systems (1)Whitewaterwest, 2)Van Egdome. Our customer will compare the Whitewater West Canada Aquaplay modul #1050, is a very big system, with Van Egdome. And for the slide, it will be about 15m high and 150m long.

Both companies are reputable companies and their products seem good. However, they seem to share the system we want, ie AP1050, which suppliers is more recommended? Your opinion is definitely important to us. We would appreciate most if you could help us.

Thanks and best regards,
W K Yap (Handphone: 65-9691 5618)
