WHITEWATER®

Entertain the Possibilities

Interactive Water Play

WHITEWATER

EST. 1980

Introduction

Leading the Industry

As the team that invented interactive water play, WhiteWater has entertained and engaged generations of families. A fundamental anchor attraction for any sized water park, our multi-level interactive play structures and spray parks can be found from municipal pools to iconic water parks all around the world.

Diversity of Choice

Whether you're looking for an accessible splash pad for kids of differing abilities, a challenging ropes course to add a teen-oriented attraction, or an all-in-one starter water park product, we have an interactive water play solution that meets the needs of your market. The breadth of our product lines means that we have options to suit every price point, capacity requirement, footprint, and demographic.
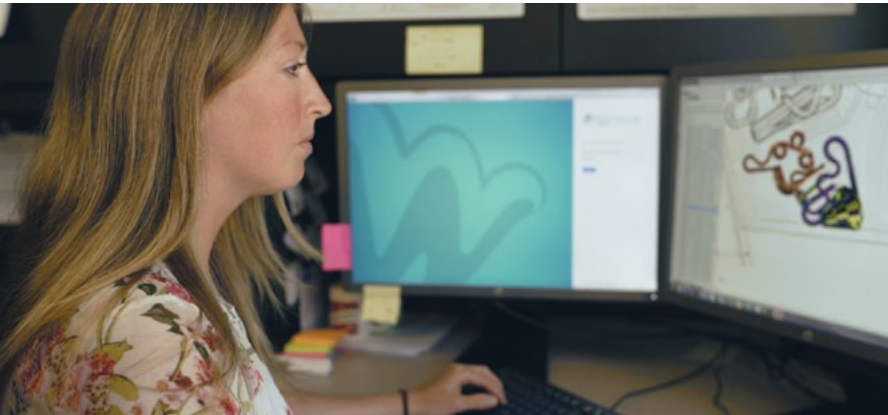

Custom Designs

Every detail of our interactive water play attractions is carefully considered with time spent on engineering to ensure manufacturing quality and accuracy; an important distinction, as each one of our installations is custom-engineered to meet local requirements, conditions, and geography. Add in custom theming to incorporate IP, branding, or a storyline and your attraction is completely one-of-a-kind.

RainFortress 4
Michigan's Adventure Beach Party

Interactive Water Play 101

Kids are the decision makers when it comes to choosing a water park—it's why this form of family-based attraction is so vital to your park. Providing the whole family with a place to play, one that keeps them engaged for hours, where parents can either join in or easily supervise from the sidelines, will keep guests of all ages happy and on-site longer. It can mean the difference between a single-visit ticket and a season pass.

Our team of experts can help you evaluate your ride mix and visitor demographics to determine if there are gaps in your offering and how to best address them. WhiteWater has a range of solutions to meet the needs of various age groups while taking into consideration your park's capacity and footprint requirements.

Solutions to Fit Your Needs

RainFortress 4
Massanutten

Fun for All Ages

Age-specific products such as splash pads and small AquaPlays create segregated zones where toddlers can play and feel safe as parents look on, while our AquaCourses make an ideal locale for teenagers to socialize and challenge themselves.

The larger end of our product range provides the entire family with options, where smaller kids can play on age-appropriate lower zones and older kids can test themselves higher up, all with clear sight lines for easy supervision.

Fun for All Spaces

Whether it's indoor or outdoor, a larger corner of your park, or a tiny wet deck, we have a product that is right for you.

Our AquaSpray elements can be added anywhere you want to up the interactivity, from a splash pad, around an AquaPlay, or over a lazy river.

Small footprints can be maximized by building up with our multi-level play structures, such as AquaPlay, RainFortress, and FusionFortress, to increase your play space along with capacity.

For a differentiator for your park, add an APX or AquaCourse, which adds in challenging, but safe, obstacles, interactive queue lines, and new ways to play.

Fun for All Numbers

Adding a multi-level play structure is the perfect way to increase your capacity without increasing land use. By building up, you're adding, depending on size, instantaneous capacity without queue lines for hundreds of guests.

Capacities range from approximately 62 people on an AquaPlay 50 to over 1,600 on a FusionFortress 17.

Fun for All Abilities

As the world becomes more accessible, so do water parks. Creating inclusive play spaces where everyone can play is a simple way to ensure that all your guests have a chance to enjoy the fun and excitement of a day out at a water park.

Read through the many different ways we can make your interactive water play attractions more accessible for a range of abilities on page 17, we are happy to talk you through how to create fun for guests of all abilities.

Tips to improve your park's inclusiveness:

- Starting at the pool level, using a zero-depth pool entry or a wet deck will make any attraction more accessible for those with physical limitations.
- Upgrading from concrete to Life Floor, an impact-absorbing flooring, will increase playability and safety for all guests.
- Add ramps and ADA doors to AquaPlay decks so that children with physical limitations can reach slides and higher up interactives.
- Ensure that there are plenty of deck-level interactives with AquaSpray interactives or add a play structure that includes them within reach, such as AquaForms.
- Consider increasing the water temperature at some attractions so that kids with conditions that maybe preclude them from colder temperatures can play.
- Add visual cues to alert children with hearing impairments that the tipping bucket is about to tip.

Features and Options

With a wide range of products to choose from, finding an interactive water play solution that meets your size, capacity, and budget requirements couldn't be easier. Each line includes features and options that help to create attractions tailor-made to your park.

Interactives

Each one of our interactive water play products features a variety of interactive elements—those fun, hands-on features that empower kids to play, not just with water, but with their fellow merrymakers.

Cause-and-effect interactives, water blasters, and surprise geysers increase the play value on all our structures. Robust and kid-approved, they have been carefully designed to ensure that they work through whatever punishment kids and the weather can throw at them.

Standard on AquaSpray, AquaForms, AquaPlay, RainFortress, FusionFortress, APX, and AquaCourse.

Theming

All of our interactive water play structures are available in standard colours or custom theme. WhiteWater's team of artists and designers can enhance any play structure or spray park with detailed hand-carved theming to stimulate the imagination. Send your guests on an adventure through a tropical jungle or deep into a colourful ocean.

Our in-house team of experts can adapt IP, local imagery, storyline, branding, or signage to transform your space into an immersive and unique play experience.

Available on AquaSpray, AquaForms, AquaPlay, RainFortress, FusionFortress, APX, and AquaCourse.

Play Surfaces

Our recommended play surface for all our interactive water play products is Life Floor. Created as an alternative to conventional surface coatings, Life Floor is a foam-rubber flooring system that delivers unparalleled safety, play value, and comfort. Kids are able to play freely without the fear of getting hurt due to Life Floor's impact absorption technology which is proven to significantly reduce slips and falls.

Offered in 30 colours, two textures, and a variety of thematic inlays, Life Floor's die-cut designs are available in a growing collection of shapes, including seashells, animal footprints, and flora. Custom designs are available upon request.

Available on and under multi-level play structures, pool decks, splash pads, zero-depth entries, and play features.

AquaSpray

From Splash Pads to FusionFortresses

AquaSpray water activity elements are individual features which can be configured to create a dynamic splash pad or added around a multi-level play structure or lazy river for extra splash. These features are designed to be used in wet or dry parks and are very effective even under low water requirements.

AquaSplash

The AquaSplash line complements the Interactive Water Play products in WhiteWater's portfolio, and helps create a well-rounded, multi-element splash pad that's suitable for kids of all ages—from toddlers to teens. With hundreds of elements that can be chosen from and combined to create a one-of-a-kind experience, we have options for every price point, capacity requirement, footprint, and demographic.

Collections

Because of the breadth and variety of the AquaSplash product line, we have grouped similar elements together based on colour, theme, and function into nine Collections.

Product Lines

The AquaSplash product lines include Add-ons, elements that can be added into any Collection; Stones & Spray Clusters, that encourage creative play; Ground Sprays, that can feature music and step-on sprays; Illuminators, that add dazzling colour effects to Ground Sprays; WaterWays, that encourage kids to discover the fun ways that water moves; and Discovery Stream, that fosters kids' imaginations with its modular stream packed with water weirs.

Collections

Prism

Packed with colourful elements, just like the daydreams of children, Prism captures the imagination with its bright yellows, reds, and greens with a multitude of shapes, animals, and plants in the theme.

Twist & Spout

Futuristically-inspired, the Twist & Spout collection combines purples, blues, and silver with circular, curved elements that spin around their axes. This collection is perfectly suited to urban-themed water parks that benefit from its sophisticated, spherical look.

Rockstar

Kids can let out their inner musician with this musically-inspired Collection. Rockstar includes a keyboard, trumpets, bells, and more. A few of this Collection's components, such as the Sound Spray and Maestro feature sound which help bring everything to life.

Flora & Fauna

Think Mother Nature but enhanced with more fun and excitement! The Flora & Fauna Collection turns things we see around us daily—flowers, worms, butterflies, mushrooms, leaves, caterpillars, and more—into water sprouts and fountains.

Safari

What can be more fun than embarking on an adventure to a safari? With a variety of palm trees, flowers, and animals like horses and giraffes, kids can unleash their inner wildlife explorer.

High Seas

Sailing the high seas in a pirate ship is every kid's fantasy, and we've taken it as inspiration for this seafaring collection that encompasses sails, an octopus, compass, ship's wheel, anchors, periscope, and more.

Shoreline by ehring

What can be more fun than embarking on an adventure to a safari? With a variety of palm trees, flowers, and animals like horses and giraffes, kids can unleash their inner wildlife explore

Grasslands by ehring

There is nothing more beautiful than the wonders of nature, and our Grasslands by ehring Collection emulates the majestic natural beauty that surrounds us. Grasslands takes a cue from the world around us and combines it with sprays, soakers, drops, and more.

Cirque by ehring

With the spirit of collaboration at its heart, Cirque by ehring brings back memories of the circus, with bright, bold colours and whimsical, looping play features. Kids can work together to spin cannons and activate Boingos or shoot jets of water at their friends.

AquaForms

Maximize Fun

Recognizing that there's more than one way to play, AquaForms embraces all of the ways in which children socialize, explore, and make believe. Go beyond interactive features by also incorporating vibrant colours, textures, shapes, and patterns to engage young minds and create endless possibilities.

AquaForms 200
Cook Creek Pool

Maximize Space

Balancing both style and substance, AquaForms provides more available play space while minimizing its footprint. Its outwardly flared structural system, not only creates a unique aesthetic, but also creates larger decks for playing with more room on the pool level for exploring.

Maximize Options

The most configurable structure in our interactive water play category, AquaForms can be designed in a variety of models and designs.

Choose from a library of decks heights, bridges and stairs, tipping buckets, and interactive features to create a one-of-a-kind play destination.

AquaCourse

A New Way to Water Play

AquaCourse is a harnessed multi-level play experience that allows each member of the family to choose their own level of adventure. Featuring four zones with varying levels of difficulty, thrill, and water saturation, guests traverse towers and bridges while safely harnessed in.

AC 120
Alabama Splash Adventure

360 Degrees of Interactivity

Combining the excitement of Ropes Course with the interactivity of AquaPlay, AquaCourse delivers high challenge activities in a water-filled environment. Ultra interactive, even guests in queue lines can join in on the fun with perimeter interactives aimed at those in the course and vice versa.

We've Got You Covered

WhiteWater designs and manufactures all of our interactive water play products in our North American facility in order to control and ensure their quality. Safety is paramount at WhiteWater, and the design of our interactive water play structures is no exception—using probes, walkthroughs are completed to identify, and if present, eliminate entrapment and pinch points on all structures.

Designed to meet the toughest aquatic environments, both indoor and out, every structure and feature is carefully considered and constructed from the highest quality components.

- WhiteWater's water slides are made from industry-leading SilkTek fiberglass and can feature AquaLucent and translucent fiberglass to create truly memorable slide experiences.
- Deck surfaces are made of non-skid finishes that are gentle on the feet and easy to keep clean.
- Every structure's construction is stainless steel below the waterline to minimize corrosion and extend its life.
- Above the water line, structures are made entirely from galvanized and triple-coated steel that is available in over 200 colors.
- All our interactive elements have been kid-tested for play value to ensure that they're not only fun but can also stand up to the rigours of use and weather.

What does this mean for you and your park when you buy any of our interactive water play products, or any product, from WhiteWater? You will be buying the highest quality, safest, and most thrilling attractions on the market—attractions that we stand by with our WhiteWater Warranty.

Steel standpipe

Galvanized coating and paint preparation

Special epoxy primer

Top coat polyurethane finish

Second coat - chemical resistant polyurethane finish (standpipes in water)

Nylon coated valve

A Rust-Free Environment

Stainless steel and galvanized piping are finished with a premium coating system that keeps your AquaPlay™ looking brand new for years.

WHITEWATER

EST. 1980

WhiteWater was born in 1980 with one clear purpose, to create places where families unite and make joyful lasting memories.

We achieve this by standing alongside our customers from concept to completion of award-winning attractions, from slides to water rides and everything in between. We aim to inspire our clients by unleashing our creativity to realize their ambitions; we craft solutions which make each park unique. We are dedicated to making products that operators can count on, because we understand the importance of reliability and efficiency on the bottom line.

As market leaders, we put our success down to our attitude, in all our years we've never once forgotten why we're here – to help parks solve problems, create immersive experiences, and delight guests all over the world.

We're here to create places where fun thrives.
