WHITEWATER®
EST. 1980

 3 RAFTS IN WHEEL SIMULTANEOUSLY

 OPTIONAL DYNAMIC LIGHTING SYSTEM

 1 RAFT IN EXIT FLUME

 ICONIC ANCHOR ATTRACTION

SPECTACULAR FIBERGLASS EFFECTS 

96-SECOND WHEEL RIDE TIME 

WORLD'S ONLY ROTATING WATER SLIDE 

140 METERS (460 FEET) SLIDE LENGTH 

110 SECONDS TOTAL RIDE TIME 

FOR YOUR GUESTS

A first-of-its-kind slide, SlideWheel naturally has a first-of-its-kind ride experience.

Every 32 seconds, rafts are launched into the perpetually spinning SlideWheel where they plunge and oscillate along the moving flume before being churned out into a final serpentine that descends them 11.5 meters (38 feet) into a pool entry. Riders are rewarded with a 96-second spectacle of physical and visual wonders inside the spinning wheel that they are sure to talk about.

FOR YOUR MARKETING

A familiar sight in amusement parks, the captivating display of moving attractions has never been seen before in water parks.

The guest interest, word of mouth, and social media buzz that SlideWheel creates is immeasurable. SlideWheel's impressive 22-meter (72-foot) height when combined with its fiberglass and light effects create an incomparable spectacle, visible, both day and night, from any vantage point. This is the type of attraction that people travel to see and share on their social profiles.

FOR YOUR OPERATORS

SlideWheel's launch conveyor with integrated dispatch control and video surveillance system streamline safe operations.

The three-conveyor system ensures that the slide's 16 rafts are in continuous operation from staging to launch and back up again—guaranteeing that three rafts safely navigate the wheel while one is riding the exit flume—maintaining a steady stream of 450 guests per hour.

FOR YOUR BOTTOM LINE

It's generally accepted that a new iconic attraction will help drive your park's attendance and maybe even allow you to raise your gate.

SlideWheel's unique physical presence makes for great passive capacity, helping to also boost ancillary revenue. Add to that the unmatched phenomenon of oscillating through a rotating water slide and SlideWheel quickly becomes the most popular amusement ride on everyone's must do list.

TECHNICAL SPECIFICATIONS

4-PERSON FAMILY RAFT

Estimated Hourly Capacity	450 riders
Standard Dispatch Rate	32 sec

Minimum Rider Height	1.4 m / 55 in
