

WhiteWater Log Flume Boat

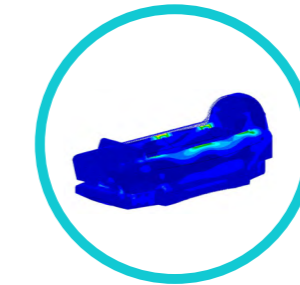

In the 2021 re-designed version of this classic ride, the vehicle offers traditional theming combined with an all-new, high-tech composite body.

Unique Features and Benefits

RUST-FREE HIGH-TOUCH SURFACE

2 grab bars made of stainless steel for long-lasting corrosion resistance on a high-touch surface.

DURABILITY THROUGH METICULOUS ENGINEERING

To enhance durability, extensive Finite Element Analysis (FEA) was used in the design of the hull to simulate and optimize the dynamic load-bearing capacity.

OPTIMAL LOAD DISTRIBUTION

The hull of the Log Flume boat has been redesigned with an all-new laminate for optimal load distribution.

CORROSION RESISTANT

304 stainless steel material for all wheel brackets and hardware for superior corrosion resistance.

EXTRA SAFETY FOR MAINTENANCE

Tow-point anchors for safety tie-offs during maintenance

WATER DAMAGE PREVENTION

All wooden reinforcements have been replaced with extruded fiberglass structures to prevent premature swelling and blistering.
