

WhiteWater River Raft

In the 2020 re-designed version of this classic, WhiteWater combines safety features with operational efficiency and ease of maintenance. This raft will delight your guests both big and small with more comfort than ever before and at the same time, reduce the workload for your operations team.

Unique Features and Benefits

SAFETY WITHOUT DISCOMFORT

8 grab bars that are safely within reach for riders of all sizes. There is no need to lean forward in an uncomfortable position to hold onto a common bar.

EASE OF LOAD/UNLOAD

Each seat back has 4 individual non-slip integrated handles to allow for different heights of load/unload grab points.

FAST DISPATCH

The center of the boat is uncluttered and allows for fast and safe load/unload

CHIP RESISTANT

Reinforced plastic seatbelt buckles prevent chips and dings from forming on the fiberglass surfaces.

SAFE AND CONTROLLED ENTRY/EXIT

8 entry/exit points on each vehicle make for quick loads and unloads because the boats can enter the station in any orientation.

DURABLE HULL

Our vacuum injection molding method for manufacturing the hull provides optimal resin to fiber ratio, leading to stronger and longer lasting decks.

SAFETY IN NUMBERS

The flotation collar is composed of multiple inflated bladders that keep the raft stable in the event of a deflation.

BUMPY YET STABLE FUN

The large diameter of the flotation collar allows for maximum stability during the ride while still giving all the bumps and splashes that make River Raft Rides fun.
